## Frosty Freeze Soft Serve Machine

### Operating Instructions:

- 1) Plug machine into its own standard **15 amp** outlet.
- 2) **Do Not use an extension cord!**
- 3) Make sure the hopper is securely seated on the machine prior to putting any mix in the hopper. (Press firmly, but gently against or near the spigot on the hopper towards the back of the unit to make sure the hopper is firmly set.)
- 4) Attach the drip tray into the holes underneath the spigot; then attach 1 - rounded side panel on each side of the hopper if not already attached.
- 5) Using scissors; cut off the corner of soft serve mix pouch and pour the entire bag of the liquid soft serve mix into the hopper; then place the lid back on to the hopper. **Unit will not operate without the lid.**
- 6) Switch on the main power switch, and all 3 of the other switches should be flipped to the **ON** or ("**I**") position in order to make soft serve ice cream. (**Power, Light, Snow Flake & Soft Serve Symbol**)
- 7) Now we wait for the magic to happen. It will take approx. 2 hours depending on the temperature and other variables to freeze.
- 8) Once the Soft Serve is frozen you can adjust the thickness by raising or lowering the temperature next to the thermostat.
- 9) Before dispensing your serving be sure to press the easy dispense button to the right of the spigot to make it easier to dispense the product.

### Cleaning Instructions:

- 1) Rinse inside of hopper with 1 gallon of warm water and drain through the spigot into a bucket and rinse out the drip tray.
- 2) **DO NOT TAKE THE MACHINE APART! Unless otherwise instructed.**
